

Azhar Khalid

Backend Engineering Enthusiast

About Me

I'm a backend engineering enthusiast with 8 years of hands-on experience turning complex problems into solutions. My journey spans the financial, telecommunications, and digital identity sectors, where I've honed my craft in Java and the art of building scalable, robust systems.

I thrive on diving into intricate architectures, optimizing performance, and discovering the magic in clean, efficient code. Always curious and always learning, I'm the kind of engineer who gets excited about debugging as much as building something from scratch. Backend engineering isn't just my job—it's my playground.

Skills

- | | |
|-----------------|--------------|
| 1. JAVA | Expert |
| 2. SPRING BOOT | Expert |
| 3. ORACLE/MYSQL | Expert |
| 4. DOCKER | Expert |
| 5. REDIS | Expert |
| 6. GO | Intermediate |
| 7. REACT | Beginner |

Education

Bachelor of Computer Science (GPA 3.62)

STMIK Pranata Indonesia

2012 > 2016

- Graduated as one of the top students in the cohort.
- Developed a strong foundation in basic programming and software development principles.

Experiences

VIDA Digital Identity

Senior Backend Developer

MAY 2022 > PRESENT

- Designed architecture diagrams, flow diagrams, interservice communication plans, and proposed solutions to the Principal Engineer.
- Created comprehensive technical documentation for issues or bugs, including proposed solutions to address them.
- Participated actively in Agile ceremonies, including Sprint Planning, Sprint Reviews, Sprint Retrospectives, and Daily Stand-up meetings, collaborating with the VIDA Sign team.
- Developed and deployed scalable microservices to enhance system functionality.
- Provided support to QA teams during feature testing to ensure quality and adherence to requirements.
- Project **eMeterai API Backend, VIDA Sign Platform, VIDA Sign eMeterai Desktop Application**
- Tech Stack **Java, Spring Boot, MySQL, Docker, Kubernetes, Jenkins, Redis**

OTTO Digital

Backend Developer

MAY 2018 > APR 2022

- Developed, implemented, and tested application features to meet business requirements.
- Collaborated with senior engineers to design and integrate new functionalities.
- Created and maintained automated test scripts using Rest Assured to ensure API quality and reliability.
- Engaged in meetings with the product team to discuss feature requirements, provide feedback, and demonstrate completed features.
- Project **API for PeDe Mobile App, Whatsapp Bridge, Indosat Imkas API Backend, Bank INA API Backend**
- Tech Stack **Java, Vert.x, MySQL, WSO2 API Gateway**

XL Axiata

Java Developer

APR 2017 > APR 2018

- Maintained and enhanced **XL Prioritas Web** and Back Office
- Debug and troubleshoot technical issues in existing software
- Participate in Agile Scrum development processes, including sprint planning and retrospectives
- Tech Stack **Spring Framework, Java Server Pages, Oracle Database, Git**

Dimo Pay

Java Developer

JAN 2017 > MAR 2017

- Developed a **BRI Credit Card Access Portal**
- Design, develop, and maintain software applications
- Collaborate with Tech Lead to define and implement new features
- Tech Stack **Java, Spring Framework, ThymeLeaf, MySQL**

Adira Finance

Oracle PL/SQL Developer

MAY 2016 > DEC 2016

- Maintained and enhanced Adira Account Management Module
- Resolve Production Bugs and Issues
- Collaborate with Senior Analyst to learn Adira Business Process
- Tech Stack **Oracle Database, Oracle PL/SQL and Oracle Forms**

Xsis Mitra Utama

Bootcamp Java

FEB 2016 > MAY 2016

- Learn Java fundamentals
- Learn Object Oriented Programming
- Learn Spring Framework
- Tech Stack **Struts Framework, Java Server Pages, MySQL**
